TERMS.

PRICES herein are net for the goods shipped from factory and delivered on cars at any railroad station in the United States east of the states of Montana, Wyoming, Colorado and New Mexico, provided shipment amounts to not less than one hundred pounds. Any two units with top and base will weigh the required amount. On smaller shipments purchaser must pay transportation charges. On prepaid shipments the right is reserved to select route and manner of shipment. Prices do not include express shipments, charges on which must be paid by purchaser. On territory outside of that described above special prices on cars Cincinnati will be quoted on request.

Globe-Wernicke "Elastic" Cabinet.

A SYSTEM OF UNITS.

CAPABLE of expansion—expanding with your requirements—growing with your business —conforming to your necessities.

The solid unchangeable form of cabinet does not meet the ever-shifting business conditions of the present day. It is stationary. Business is progressive, expansive. The modern cabinet must be progressive and expansive, and the Globe-Wernicke "Elastic" Cabinet is the only one possessing these features.

The business or professional man, whose office comprises little more than desk room, may begin with a single unit of such filing devices as he may require, with top and base to complete the cabinet, and add to it unit by unit as his business expands and room increases, to an extent limited only by the space at his command.

He will have had no outgrown cabinets to discard or trade in at a sacrifice — no surplus filing capacity of one kind and not enough of another—no cabinets that fit a certain space in one office but are the wrong size for another —no cases too large to move with ease or pass through the smallest office door.

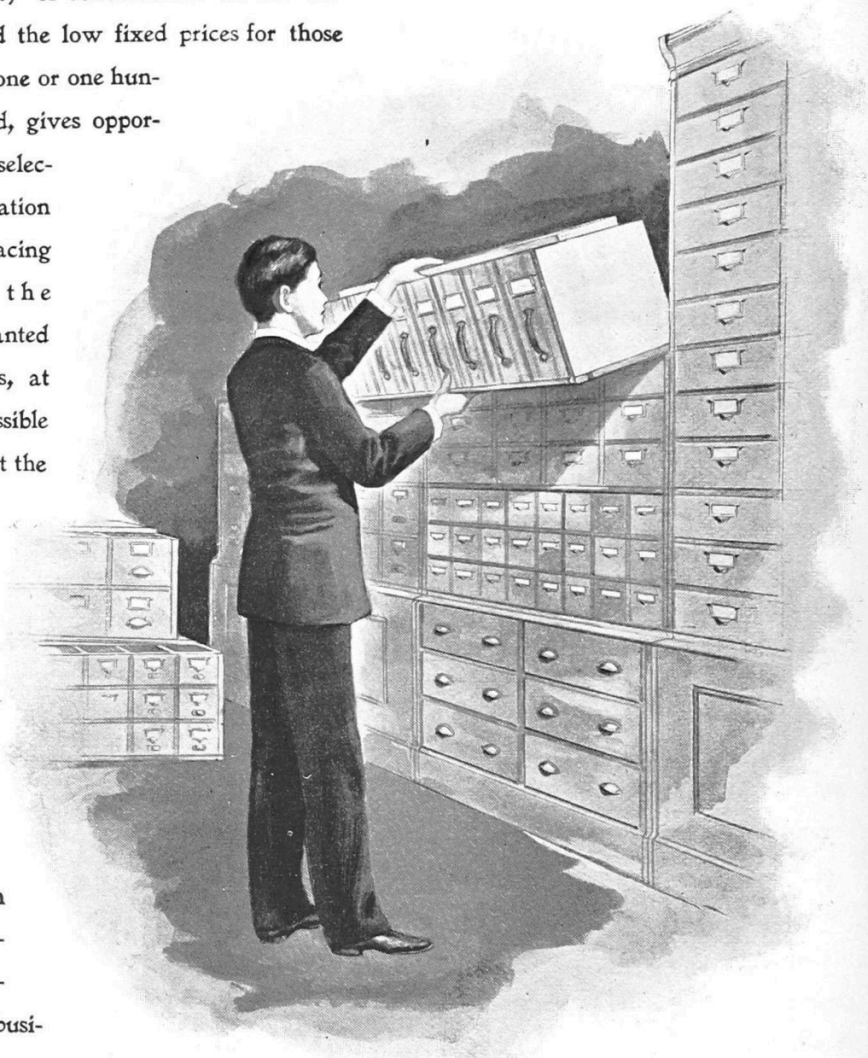
His original cabinet will continue in use as part

"may begin with a single unit."

of the larger system. His filing capacity, being increased only as wanted, will contain at all times just the assortment of filing devices required. Capable of horizontal or vertical expansion, his cabinet may be arranged to fit a particular space in one office, re-arranged to suit a different space in another office, or subdivided into several cabinets to suit various locations in different offices. Moved one unit at a time his largest cabinet can be handled by the office boy and moved through an opening 25 inches square.

The variety of conveniences in the different units and the low fixed prices for those units, whether one or one hundred are ordered, gives opportunity for the selection of a combination cabinet embracing practically all the filing devices wanted in any business, at the lowest possible cost and without the delay involved in making a special cabinet to order.

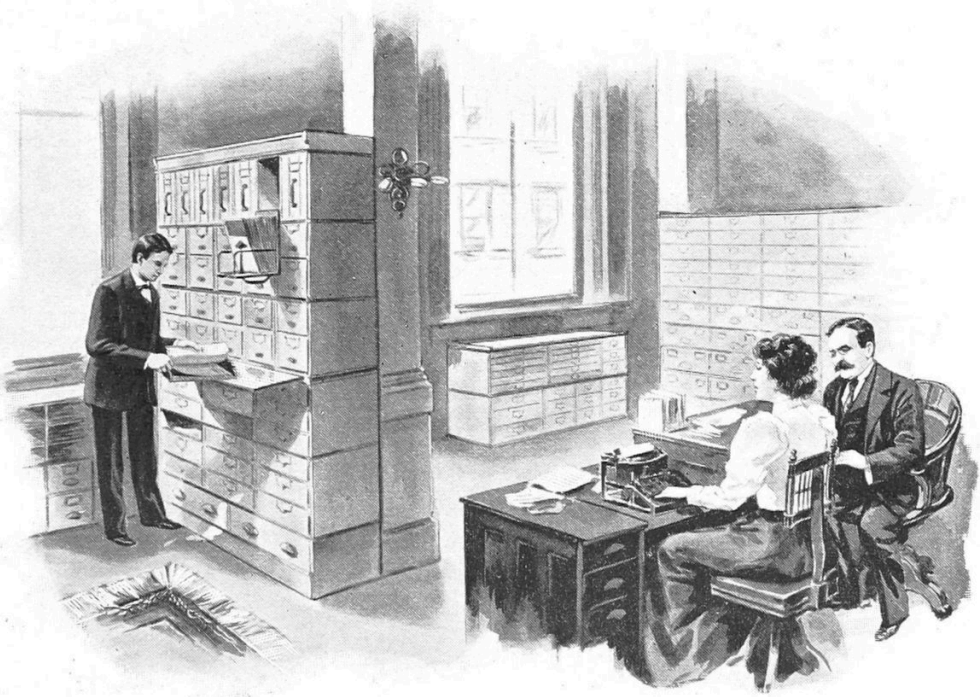
Only once, and for a comparatively brief period, does the old form of cabinet exactly fit the requirements of a business. When pur-



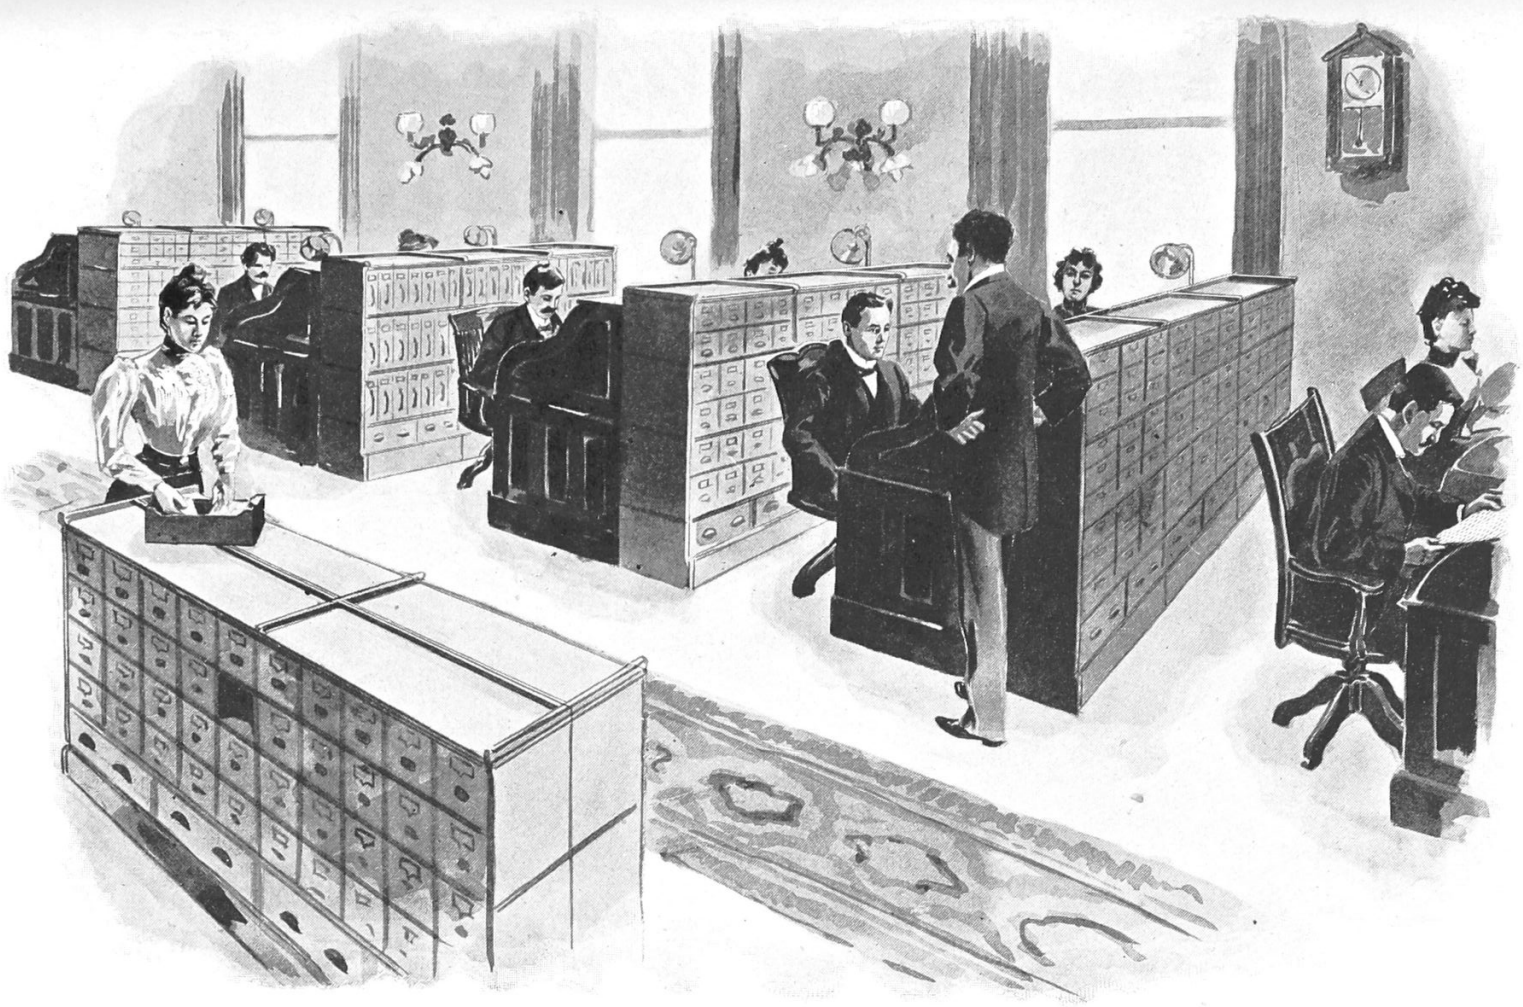
"can be handled by the office boy."

chased it probably has more capacity than needed, so as to provide for future requirements. Later the business grows up to the cabinet and then it is just right. Still later the business outgrows the cabinet and from that time its usefulness decreases. The Globe-Wernicke Cabinet is always right, first, last and all the time. Whether the business stands still or grows, the cabinet keeps pace with it. It is always finished but never complete. It possesses a combination of three valuable features not found in any other cabinet;

ADAPTABILITY TO SPACE,
CAPABILITY OF EXPANSION,
SUITABILITY TO PURPOSE.



Arranged to fit available spaces.



A convenient office arrangement made possible by using Globe-Wernicke Cabinets.

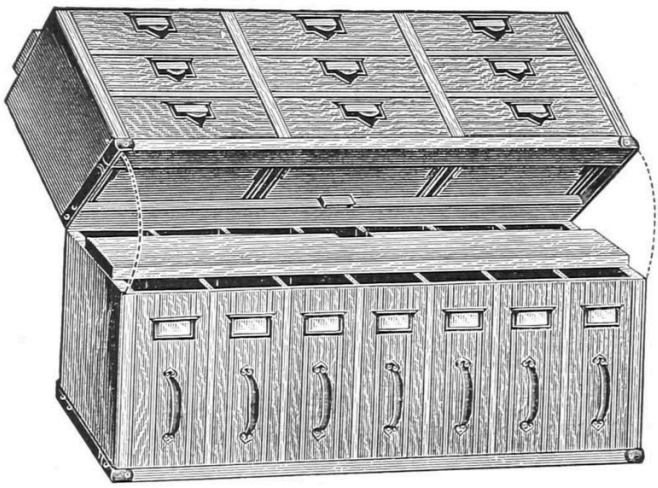
Globe-Wernicke Construction

COMPRISES sections or units, placed one above the other or end to end, each tier resting on a base and surmounted by a top, and all securely and ingeniously locked together into one compact and complete cabinet. These units may be furnished with a variety of interiors embracing filing devices of various kinds, drawers, pigeon hole cases, etc., as described in the following pages.

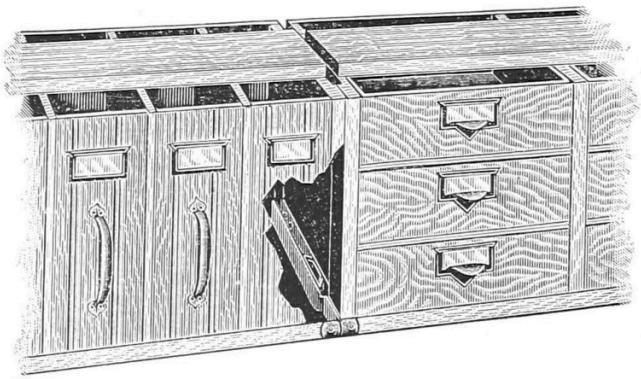
The units alone, being incomplete at top and bottom, require a base under the lower unit and a top on the upper one, or both base and top to a single unit, to make a complete cabinet.

These bases and tops are made in different styles, adapted to single units or to combinations as shown

Extensions.



THE above illustration shows the manner of interlocking units placed one above the other. The top strip or board on each unit enters between the two bottom strips of the unit above, the three pieces forming a complete bottom for the upper unit, or top for the lower unit, and interlocking in such a manner as to prevent any shifting or separating of the units. In horizontal extensions the interlocking of the units is provided for by end irons, as illustrated below. These irons are substantially made of wrought metal, with copper oxydized finish. They lock securely together and, on ends of units where seen, give an attractive finish to the cabinet.



Globe-Wernicke Units

ARE made only in Quartered Oak. They are all 41⅜ inches wide outside, but of two depths, 13 inches and 17 inches respectively, and 13⅛ inches high, excepting the slide shelf unit which is but two inches high.

The outside dimensions of any combination wanted may be readily figured from the above, adding in the dimensions of tops and bases given in descriptions of same.

NO. 13 UNITS measure 13 inches deep from front to back. They will fit on top of either No. 13 or No. 17 units or bases, or No. 25 bases. Complete cabinets may be made up of No. 13 units (see pages 29 to 33), in combination with No. 17 units or bases (see pages 34 to 36), in combination with No. 25 base and No. 17 units (see page 38), or with No. 25 base only (see page 37).

No. 17 UNITS measure 17 inches deep from front to back. They are so made that either No. 13 or No. 17 units will fit on them, or they will fit on Nos. 17 or 25 bases or No. 17 units.

TOPS AND BASES

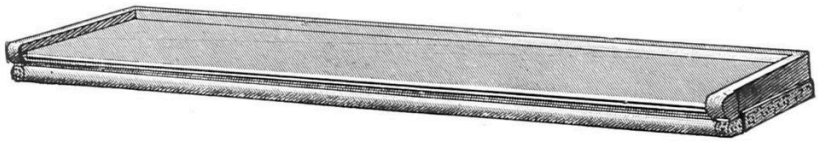
Are all made the same length as the units, 41⅜ inches, but of different heights, as given in descriptions. The tops are made in two depths, 13 inches and 17 inches, and the bases in three depths, 13, 17 and 25 inches, both tops and bases being designated by their depths, as No. 13, No. 17 and No. 25 respectively.

WHEN ORDERING

Be sure and include top and base for each vertical row of units. The necessity for this will be seen from the construction of the top and bottom of the units illustrated on previous page.

Designate units, tops and bases, exactly as given under illustrations.

Globe-Wernicke Tops and Bases.



F. Top.

A FLAT top, 2¼ inches high, made in No. 13 and No. 17 sizes. Designed for use on single units or on low combinations. See pages 28, 35 and 36.

Net delivered price, No. 13, $2 00.
" " " " 17, 2 50.

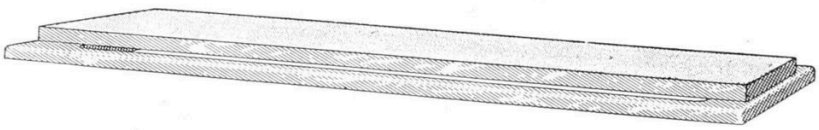
Subject to terms on page 4.

C. Top.

A CORNICE top, 5 inches high, made in No. 13 and No. 17 sizes. Designed for use on combinations five units high and over. See pages 30 to 34, etc.

Net delivered price, No 13, $2 00.
" " " " 17, 2 50.

Subject to terms on page 4.



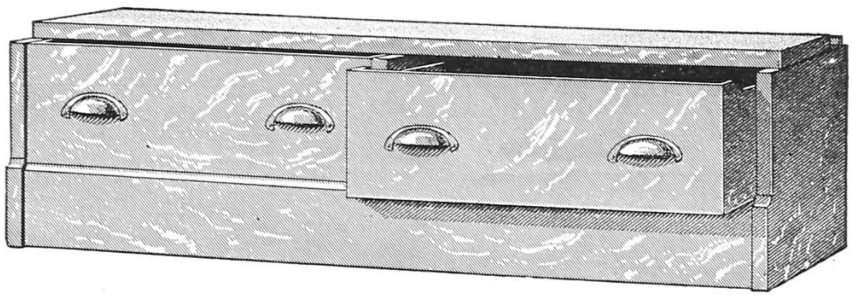
F. Base.

A LOW flat base, 1 inch high below unit, made in No. 13 and No. 17 sizes. Designed for single units or for two or three units placed one above the other. See page 28.

Net delivered price, No. 13, $1 00.
" " " " 17, 1 25.

Subject to terms on page 4.

Globe-Wernicke Bases.

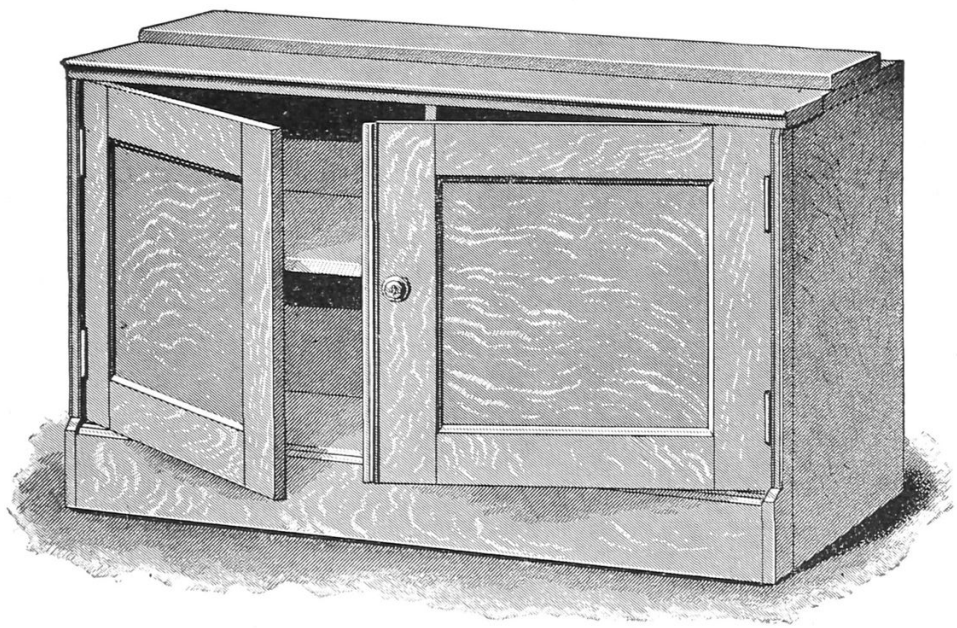


No. 13 L. D. Base.

A LOW drawer base, 10¼ inches high, for No. 13 units, containing two drawers, each measuring 18⅜ inches wide, 5¼ inches high, 11⅛ inches deep, inside. See pages 30 to 33

Net delivered price, $4 00

Subject to terms on page 4.



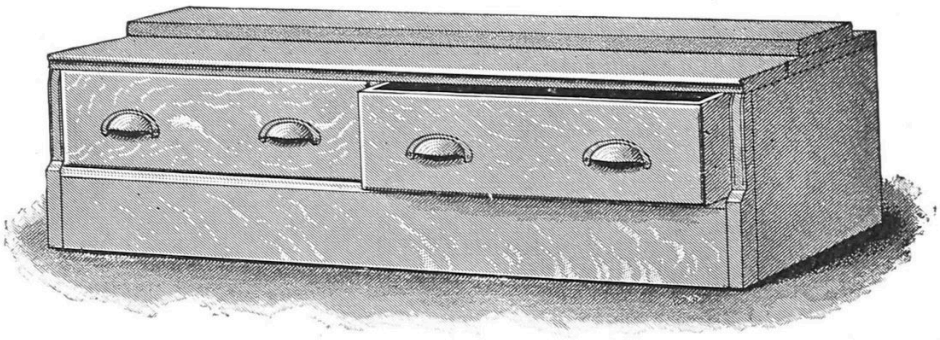
No. 17 H C Base.

A HIGH cupboard base 23⅜ inches high, for either No. 13 or No. 17 units, containing cupboard divided by upright partition into two spaces, each measuring 19⅜ inches wide, 18⅛ inches high, 15½ inches deep, inside, each space being fitted with a removable shelf. See pages 34 and 35.

Net delivered price, $13 00

Subject to terms on page 4.

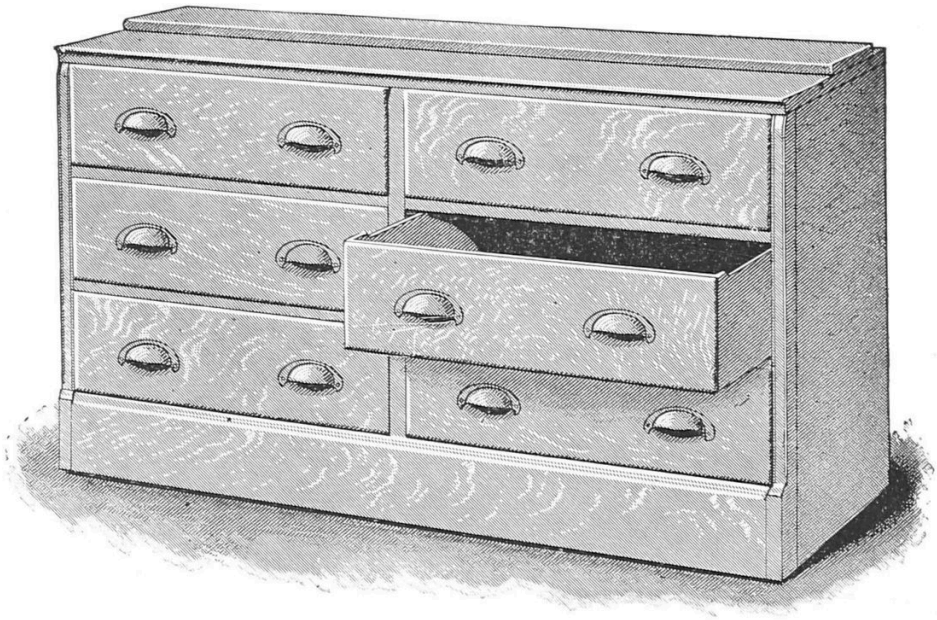
Globe-Wernicke Bases.



No. 17 L. D, Base.

A LOW drawer base 10¼ inches high for either No. 13 or No. 17 units, containing two drawers, each measuring 18⅜ inches wide, 4¼ inches high, 15¼ inches deep, inside. See page 36.

Net delivered price, $6 00.
Subject to terms on page 4.



No. 17 H. D. Base.

A HIGH drawer base 23⅜ inches high, for either No. 13 or No. 17 units, containing 6 drawers, each measuring 18⅜ inches wide, 4¾ inches high, 15¼ inches deep, inside. See page 35.

Net delivered price, $15 00.
Subject to terms on page 4.

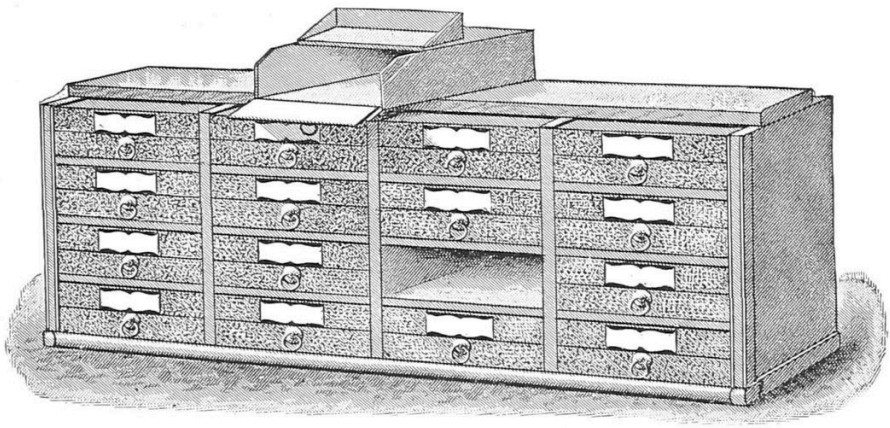
Globe-Wernicke Bases and Units.

No. 25 H. D. Base

A HIGH drawer base 23⅜ inches high and 25 inches deep (front to back), for either No. 13 or No. 17 units, containing 12 drawers, each measuring 18⅜ inches wide, 1⅞ inches high, 23 inches deep, inside. Specially adapted to holding insurance policies. See pages 37 and 38.

Net delivered price, $25 00

Subject to terms on page 4.



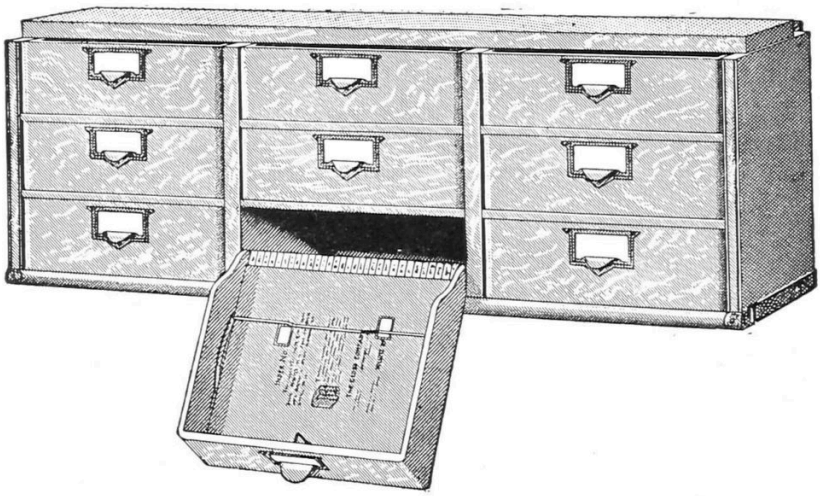
No. 13 D. R. Unit

A UNIT fitted with 16 boxes designed for filing insurance daily reports, but equally adapted to holding circulars, etc. The boxes are made of substantial tarboard, with black cloth fronts and fitted with adjustable label holder and ring pull. Inside dimensions of boxes 8⅞ inches wide, 11⅝ inches deep, 2⅜ inches high.

Net delivered price, $10 00

Subject to terms on page 4.

No. 13 Globe-Wernicke Units.



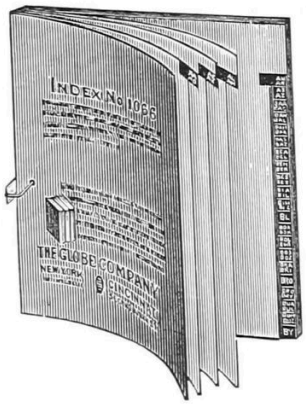
No. 13 L. F. Unit, showing File hanging by Suspending Device.

A UNIT fitted with our regular Globe Ideal Letter Files, measuring outside, 12½ inches wide, 3¾ inches high, 11⅜ inches deep. Furnished complete with indexes and labels, arranged to suit purchaser. The Suspending Device is recommended for files in units not lower than three feet from floor. See pages 30, 34 and 36. Unless ordered, files will be sent without Suspending Device.

Net delivered price without Suspending Device, $12 00
" " " with " " 14 50

Subject to terms on page 4.

The Globe Ideal Letter File



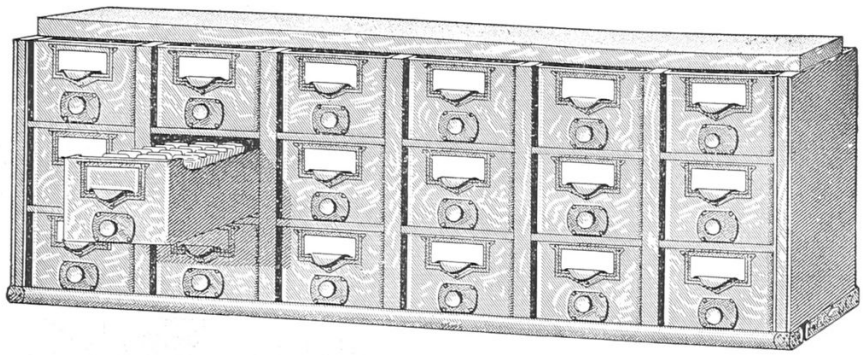
Globe Ideal Index.

CONSISTS of drawer, open at back, fitted with index attached by means of a metal safety pin fitting in a metal slot at front of drawer. The index with its contents is held down by an automatic spring compressor, direct and positive in its action. For transferring, the safety pin, with index and contents attached, may be readily withdrawn from the metal slot in drawer and all placed in a transfer case and attached securely in same by a metal device at back of case.

The Globe system of indexing, known as the "Directory" system, indexes the names by the first two, three, four, or more letters in the names regardless of the vowels, same as in a city directory. Indexes subdividing the alphabet through any number of files, or monthly, daily, numbered or other special indexes for special files, will be furnished to suit purchasers of L. F. units. Labels lettered in gold on black indicate contents of files.

Extra Indexes 16 cents each net.
Transfer Cases 18 " " "

No. 13 Globe-Wernicke Units.

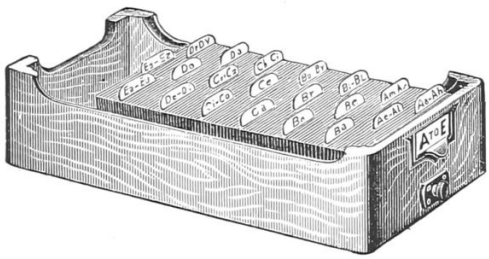


No. 13 C. I. 35 Unit.

A UNIT fitted with our regular No. 35 Single-Drawer Card Index Files for holding 3 x 5 inch cards. Capacity of each file 960 light, 650 medium, or 350 heavy weight Record Cards and 40 Guide Cards.

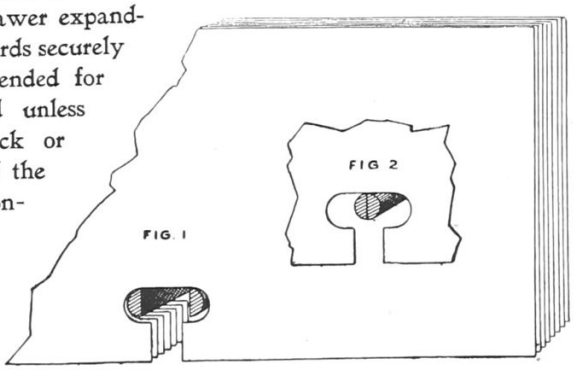
Net delivered price, without cards, $30 00

Subject to terms on page 4.



The Globe Card Index File

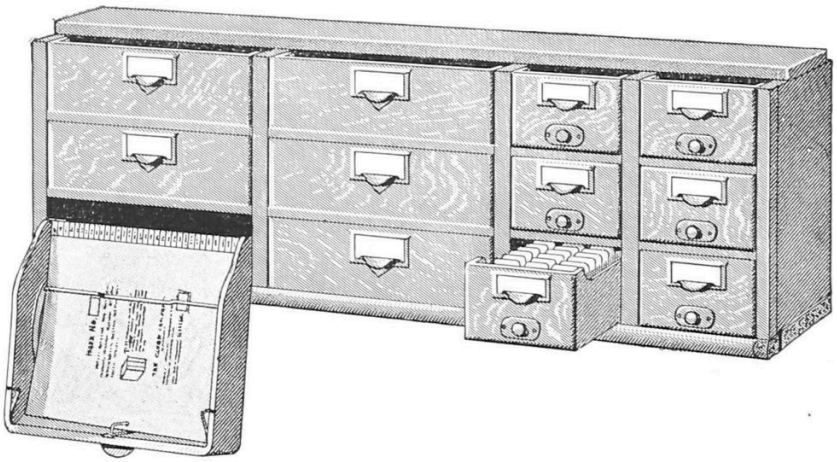
CONSISTS of a drawer specially constructed for holding record and guide cards, the drawer being fitted with rod, which runs through holes punched near lower edges of cards, holding them securely in the drawer. These rods are of two styles; the Round Rod which is withdrawn from the file when a card is to be removed; and the Duplex Rod which operates as illustrated below, a turn of the knob on front of drawer expanding it as shown in figure 1, holding the cards securely in the file. The Duplex Rod is recommended for most purposes and will be furnished unless otherwise ordered. A triangular block or follower adjusted automatically back of the cards holds them in an upright position convenient for reference.



Illustrating the Duplex Rod.

Additional information and descriptive matter regarding the Card Index File, its wonderful capabilities, with descriptions of record and guide cards, etc., will be furnished on application.

No. 13 Globe-Wernicke Units.

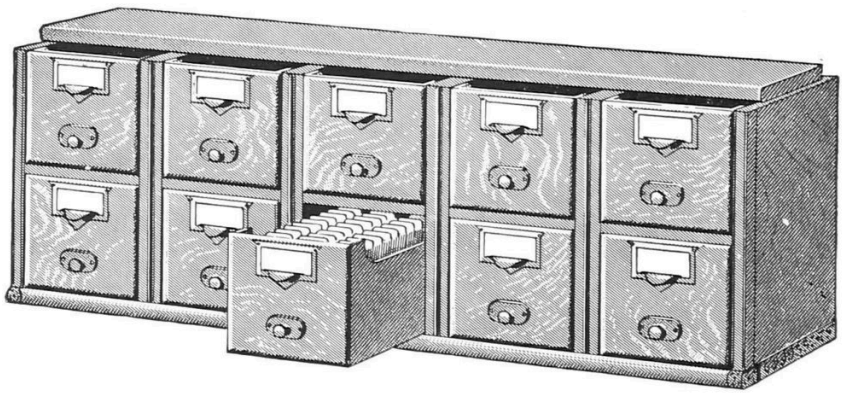


No. 13 L. & C. I. Unit, showing Suspending Device on Letter File.

A COMBINATION unit containing 6 Globe Ideal Letter Files and 6 No. 35 Single-Drawer Card Index Files, of same size and capacity as those described in the two units on previous pages. The following prices include indexes and labels for Letter Files but no cards for Card Index Files. Unless ordered, Letter Files will be sent without Suspending Device.

Net delivered price, without Suspending Device, $18 00
" " " with " " 19 75

Subject to terms on page 4.



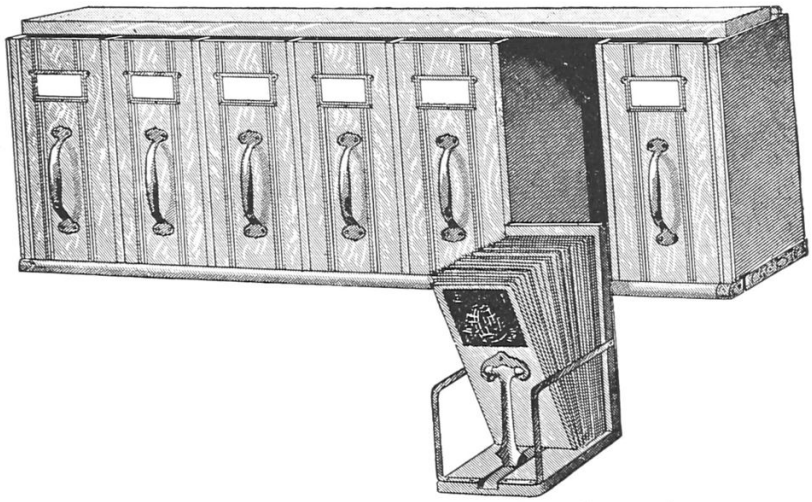
No. 13 C. I. 46 Unit.

A UNIT fitted with No. 46 Single-Drawer Card Index Files for holding 4x6 inch cards. Capacity of each file 950 light, 650 medium or 350 heavy weight Record Cards and 40 Guide Cards. These files are fitted with the same style rods, follower, etc., as the No. 35 files described on previous page.

Net delivered price, without Cards, $20 00

Subject to terms on page 4.

No. 13 Globe-Wernicke Units.



No. 13 D. F. Unit, showing File with Suspending Device.

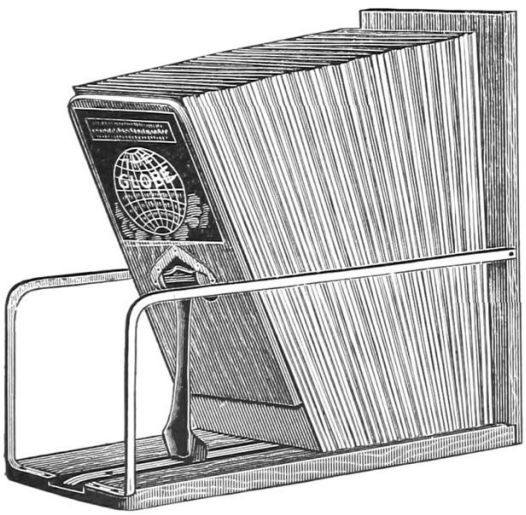
A UNIT fitted with our regular Globe Document Files of proper size to accommodate papers 4¾x11¼ inches in files with Suspending Device, and 4¾x11⅛ inches in files without this device. Unless ordered, files will be sent without Suspending Device.

Net delivered price, without Suspending Device, $10 00
" " " with " " $12 00

Subject to terms on page 4

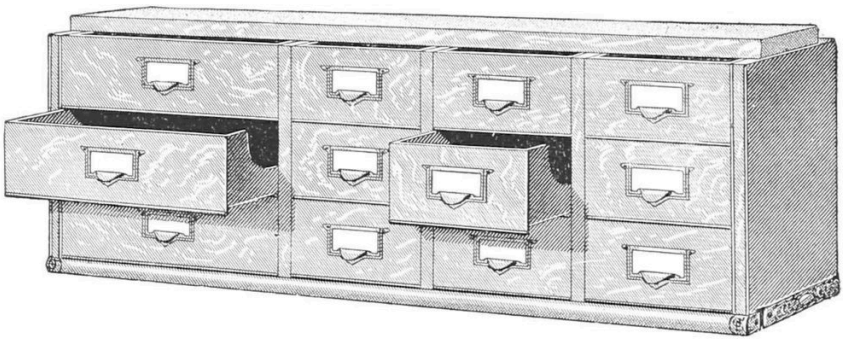
The Globe Document File.

Patented Feb. 14, 1888.



FOR folded papers the "Globe Document File" in quality, appearance and adaptability to the purpose for which intended, is without a peer. Its action is easy and simple, the clamping device or compressor direct and positive, no springs or complicated mechanism to get out of order and so thoroughly constructed that it cannot become inoperative through wear. The fronts are made of Quartered Oak, the bottoms and compressor boards of hard wood, the pulls and label-holders of polished brass, and the interior fittings of metal, nickel plated. These files are largely used in attorney's offices, court houses and public buildings and are fast coming into popular favor for general business purposes.

No. 13 Globe-Wernicke Units.

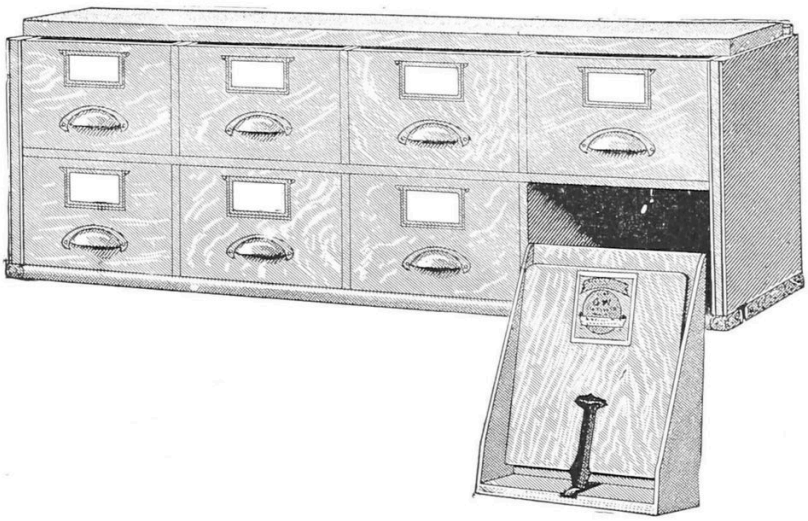


No. 13 C. D. Unit.

A UNIT of drawers specially designed to hold various size catalogues, the three large drawers measuring inside, 13⅜ inches wide, 3¼ inches high, 11⅛ inches deep, and the nine smaller ones measuring inside, 7 inches wide, 3¼ inches high, 11⅛ inches deep. Drawers cut down on one side to facilitate handling contents.

Net delivered price, $9 00

Subject to terms on page 4.



No. 13 R. F. Unit, showing File with Suspending Device.

A UNIT of Report Files made on our G. W. Document File pattern with automatically adjusted compressor boards. Will accommodate papers 8⅞x11 inches. Especially suited to holding large flat papers, photographs, etc. Unless ordered, files will be sent without Suspending Device.

Net delivered price, without Suspending Device, $11 00
" " " with " " 13 50

Subject to terms on page 4.

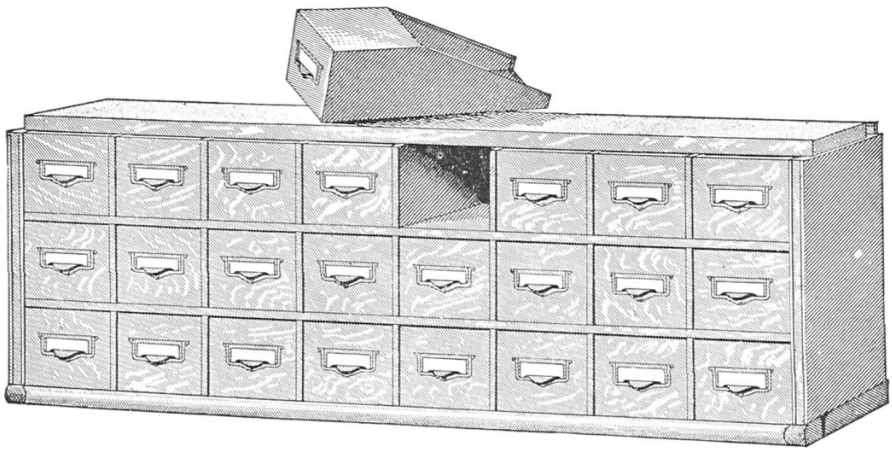
No. 13 Globe-Wernicke Units.

No. 13 L. B. Unit.

THE twelve drawers in this unit are designed especially for legal blanks, though they are equally well adapted to many other purposes, particularly for holding electrotypes. They measure inside, 14½ inches wide, 1⅛ inches high, 9⅛ inches deep. The other three drawers measure inside, 6⅝ inches wide, 3⅛ inches high, 10⅞ inches deep.

Net delivered price, $8 00

Subject to terms on page 4



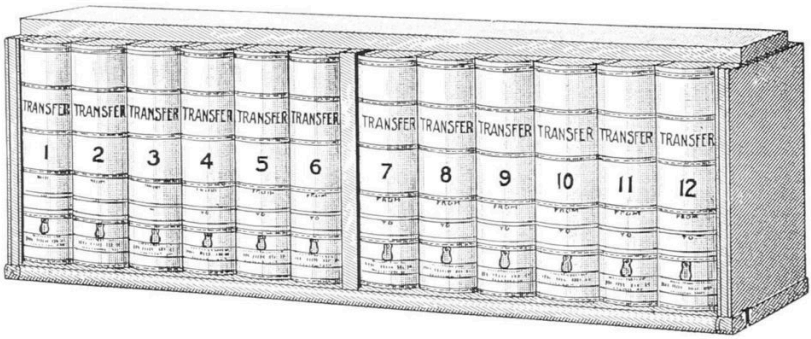
No. 13 P. H. Unit.

THE twenty-four pigeon hole boxes in this unit are all substantially made of metal with wood fronts, handsomely finished, and are the most durable pigeon hole boxes made. They measure inside, 4½ inches wide, 3⅝ inches high, 11½ inches deep.

Net delivered price, $12 00

Subject to terms on page 4

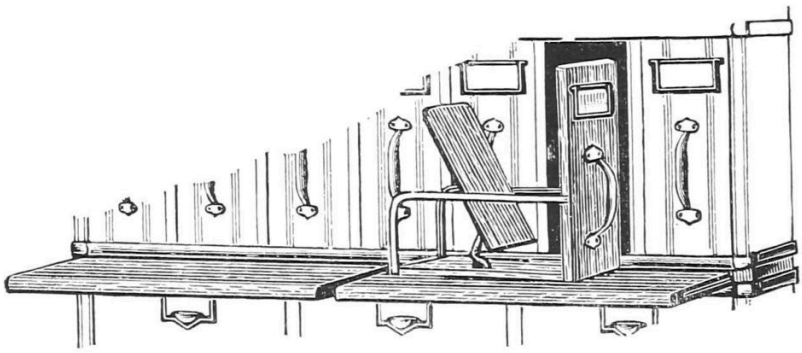
Nos. 13 and 17 Globe-Wernicke Units.



No. 13 T. C. Unit.

A UNIT containing two open spaces, each measuring 19⅜ inches wide, 12¼ inches high, 12 inches deep, inside, for the accommodation of transfer cases, books, etc.

Net delivered price, without transfer cases, $3 00
Subject to terms on page 4.

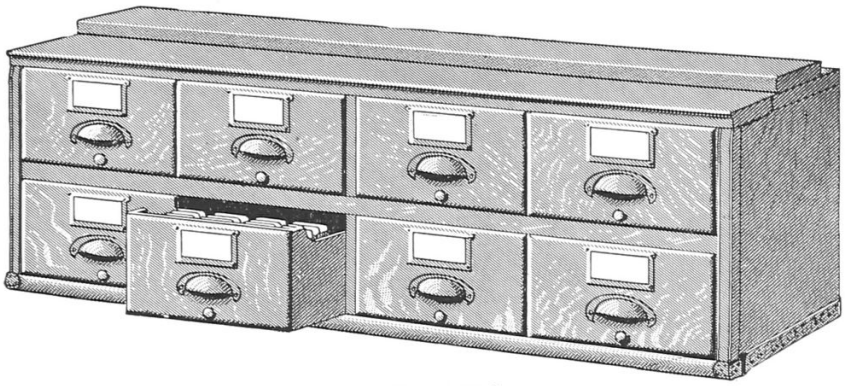


S. S. Unit.

MADE in No. 13 and No. 17 sizes. Contains two sliding shelves, occupies about 2 inches in heighth, and is designed to use between any two units. The No. 13 is used between two No. 13 Units, and the No. 17 between two No. 17 Units, or one No. 17 and one No. 13 Unit.

Net delivered price, No, 13, $3 50
" " " " 17, 4 00
Subject to terms on page 4.

No. 17 Globe-Wernicke Units.



No 17 C. F. Unit.

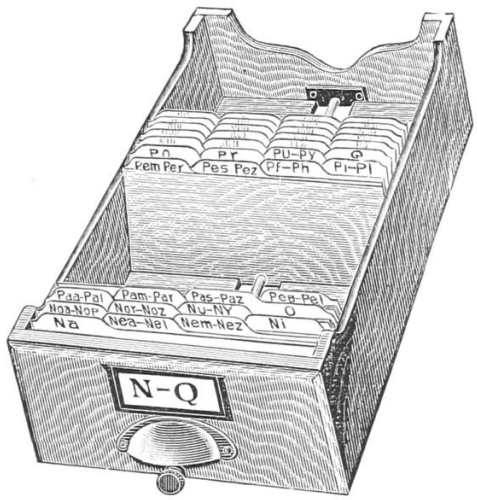
A UNIT fitted with Globe Check Files for filing cancelled checks, notes, receipts, drafts, etc. Will accommodate papers 9x3⅞ inches and smaller.

Net delivered price, $28 00

Subject to terms on page 4.

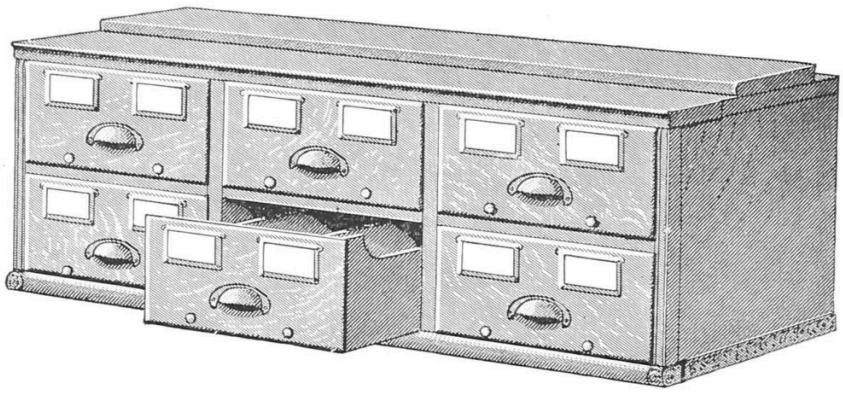
The Globe Check File

IS fitted with forty adjustable pressboard partitions, held in place by a removable rod running through recessed bottom of drawer. On this rod, back of the partitions, is also run a follower or compressor, which clamps the rod automatically at any point desired, holding the partitions, with the checks between them, snugly together in an upright position. The partitions have a projection or tab at upper edge for indexing with subdivisions of the alphabet, or with complete names of principal depositors or "Actives." If list of "Actives" is furnished their names will be copied on typewriter, attached to blank partitions and distributed properly between the indexed partitions in the files or drawers, without charge. If no list is furnished 20 partitions in each drawer will be left blank, the balance being indexed through all the files with subdivisions of the alphabet.



The drawer-fronts are fitted with adjustable label-holders and pulls of polished brass. Handsome labels, printed in gold letters on black ground, indicate contents of drawers.

No. 17 Globe-Wernicke Units.



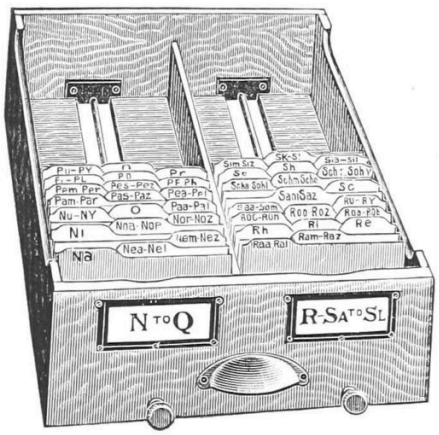
No. 17 D. T. Unit.

A UNIT fitted with Deposit Ticket Files for filing deposit tickets or other papers measuring 5⅝ inches wide by 4⅜ inches high and smaller.

Net delivered price, $28 00

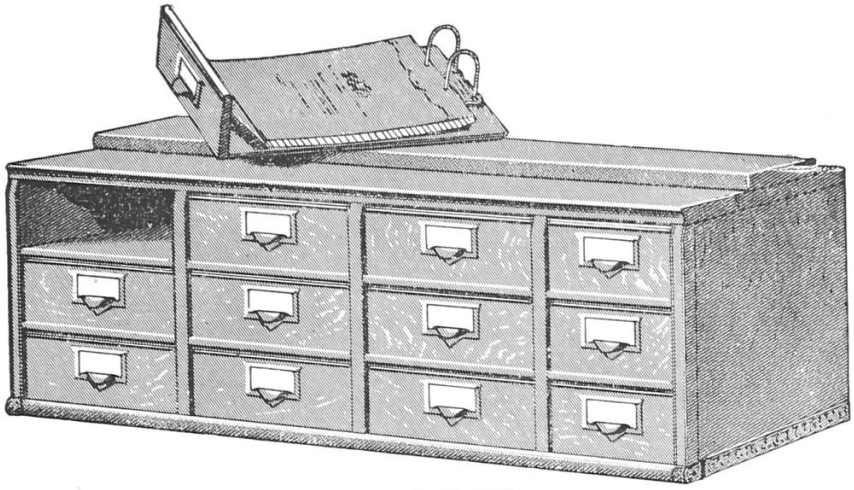
Subject to terms on page 4.

The Globe Deposit Ticket File.



SIMILAR in its construction to the Check File Drawer, but divided in two compartments by a partition through the center. The drawers will accommodate tickets 5⅝ inches wide by 4⅜ inches high, and smaller. Each drawer is fitted with 40 adjustable pressboard partitions, 20 to each compartment, the partitions being indexed and arranged in same manner as check file partitions.

No. 17 Globe-Wernicke Units.



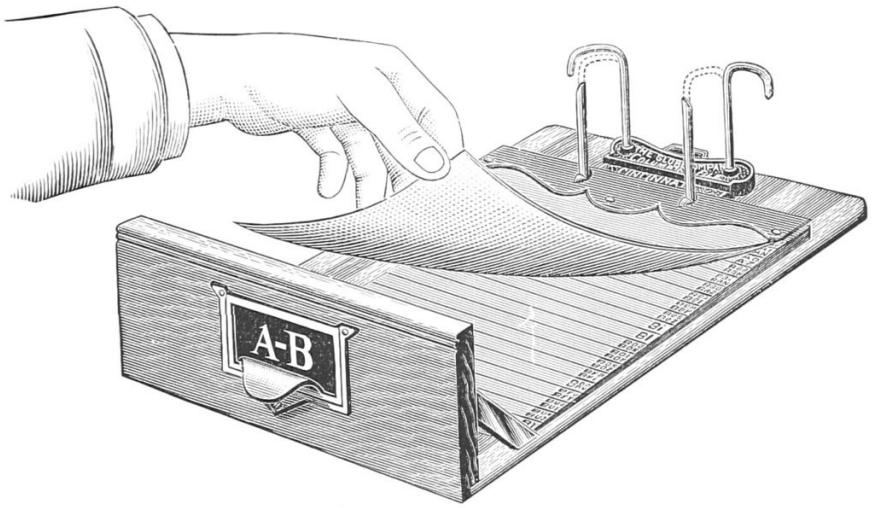
No. 17 A. F. Unit.

A UNIT fitted with 9 of our regular Columbia Arch Letter Files, accommodating papers 13½x8¾ inches and smaller, and 3 plain drawers measuring 6¼ inches wide, 3⅛ inches high, 15⅜ inches deep, inside.

Net delivered price, $15 00

Subject to terms on page 4.

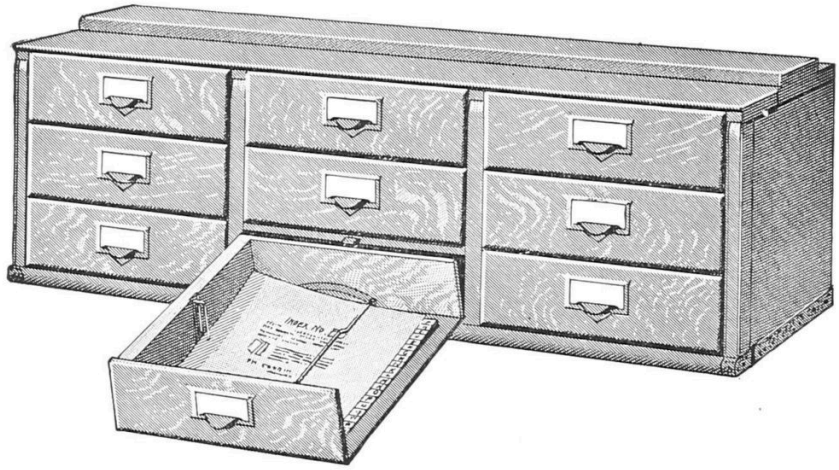
The Columbia Cabinet Letter File



CONSISTS of a double arch, the front columns of which are stationary, the arches being movable, opening outward, and opening and closing simultaneously, either arch operating both. The mechanism by which this movement is secured is strong, durable and simple, and is warranted not to get out of order.

The files are fitted with the "Directory System" indexes covered with compressor made of heavy pressboard, and a record sheet is attached to inside bottom, with ruled columns for dates and the number of the cases to which the contents of the file are from time to time transferred. A handsome metal pull or handle combined with label-holder permits the adjusting and change of labels.

No. 17 Globe-Wernicke Units.



No. 17 L. F. Unit.

A UNIT fitted with cap size letter files accommodating papers 14 x 9½ inches and smaller. All files in this unit are fitted with hook at back which catches and holds the file suspended as shown in illustrations. By raising the front of file it can be entirely withdrawn from unit. Furnished with indexes and labels arranged to suit purchaser.

Net delivered price, $18 00

Subject to terms on page 4

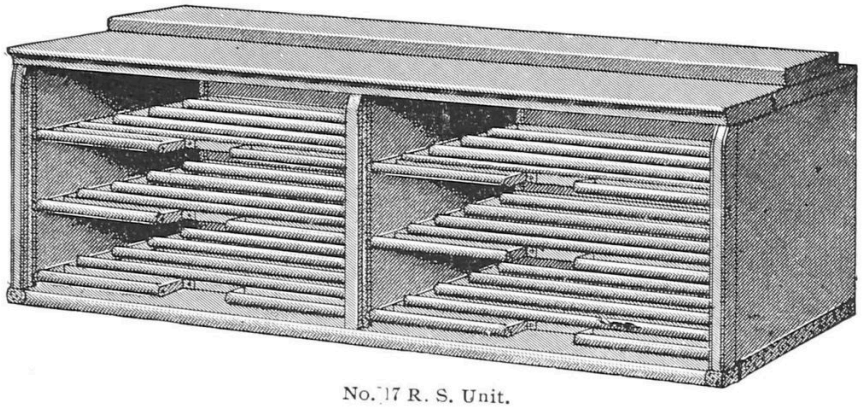
No. 17 L. B. Unit.

A UNIT of 12 drawers, each drawer being divided into two compartments by a removable partition. Full size of drawer inside is 18⅜ inches wide, 15⅜ inches deep, 1 inch high. Especially adapted to holding legal blanks, but also desirable for other purposes, particularly for holding electrotypes.

Net delivered price, $12 00

Subject to terms on page 4

No. 17 Globe-Wernicke Unit.



No. 17 R. S. Unit.

A UNIT containing 6 adjustable metal roller shelves 18¾ inches wide and 16⅜ inches deep. The shelves are adjustable in height. They are substantially constructed and operate with the greatest ease.

Net delivered price, $15 00

Subject to terms on page 4.

A FEW TESTIMONIALS.

THE CHAS. BAKER CO., Worcester, Mass.—We find your Globe-Wernicke Filing Cabinet very convenient, and are thoroughly pleased with it after a years trial.

BRADLEY FERTILIZER CO., Boston, Mass.—We are glad to give you our unqualified endorsement of the Globe-Wernicke sectional system of cabinets for filing letters, documents and blanks of all kinds. It is the most complete, economical and convenient system that we have ever used.

MOXIE NERVE FOOD CO., Boston Mass.—Some time ago when searching for some practical device for filing away correspondence that would meet with the requirements of a growing business, we were not aware that we would be so fortunate as to find a system that is so convenient and simple as the Globe-Wernicke system. We would not be without it at any cost; it is indispensible. We heartily recommend this system to all business houses.

THE MANHATTAN REFRIGERATING CO., New York City.—We find your Globe-Wernicke Sectional Cabinet system very convenient and rapid. We beg to take this occasion also to thank you for your fair and equitable treatment in all our business relations.

THOS. E. KENNEDY & CO., Cincinnati, Ohio.—We are surprised at the adaptability and range of the Globe-Wernicke system, and think it far above and beyond anything in this line to which our attention has been called or attracted. You can get only what your immediate needs call for, no matter how small they are, or how large, and at all times you have a complete cabinet, as complete with three sections as when you have increased it to thirty-three sections, and at all stages of its growth it is a handsome piece of office furniture.

THE GOOD ROADS MACHINERY CO., Canton, Ohio.—We regard the Globe-Wernicke Sectional Cabinet in every way superior to any other form of filing cabinet with which we are acquainted. We cannot find anything about the cabinet or its construction to criticise.

J. P. DOPPES & SON, Cincinnati, Ohio.—The Globe-Wernicke Sectional Cabinet we bought from you is the most useful and most satisfactory piece of office furniture we ever invested in; we heartily recommend it.

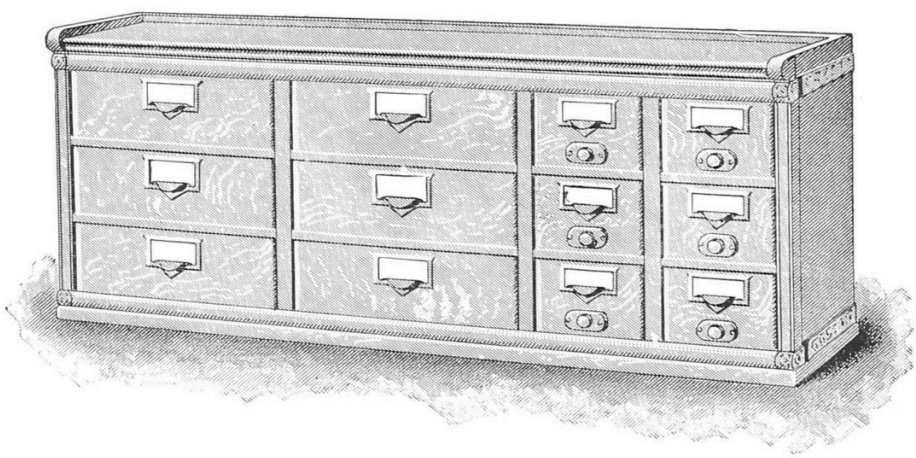
AMERICAN TIN PLATE CO., Wheeling, W. Va.—The Globe-Wernicke Cabinet which we purchased gives entire satisfaction. We know of no improvements which we could suggest.

MATTES BREWING CO., Nebraska City, Neb.—The Globe-Wernicke Sectional Cabinet which we have used in our office for some time is satisfactory in every respect, and we find it a purchase the value of which cannot be over rated.

Globe-Wernicke Combinations

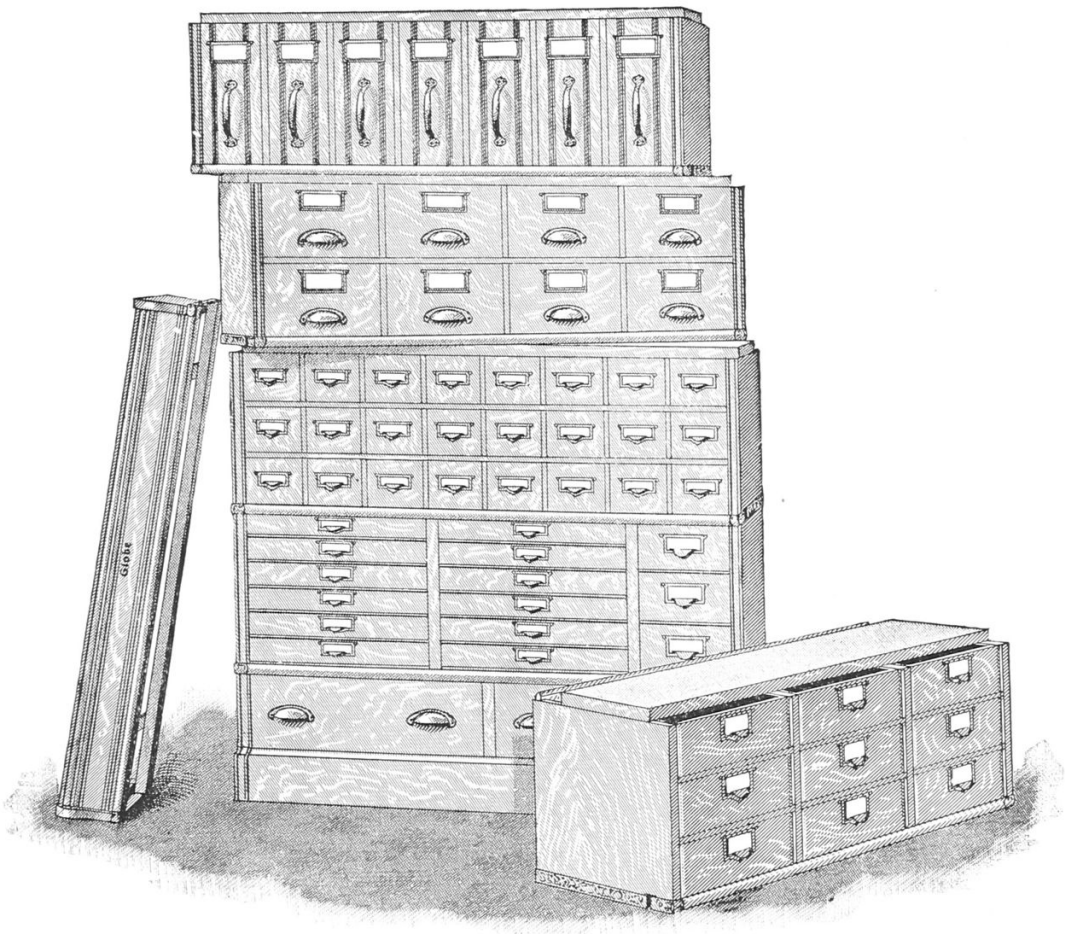
THE following show illustrations of various combinations of Globe-Wernicke Units, Tops and Bases; cabinets made up of all No. 13 Units, and of No. 13 and No. 17 Units combined, in connection with the various Tops and Bases.

These illustrations, plainer than words, describe the possibilities in the way of extent, arrangement and combinations, of which the Globe-Wernicke System is capable.

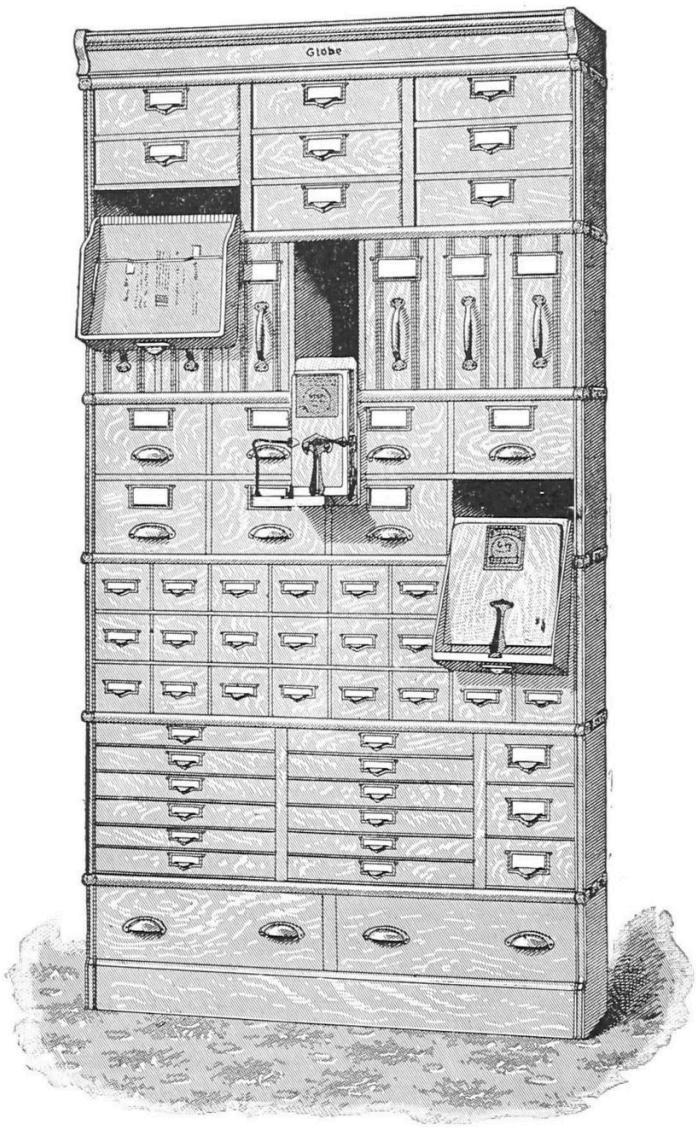


A GLOBE-WERNICKE combination comprising a single unit with flat top and flat base, made up of the following:

1—No. 13 F. Top,	- - -	See page 12.
1—No. 13 L. & C. I. Unit,	- -	See page 18.
1—No. 13 F. Base,	- - -	See page 12.

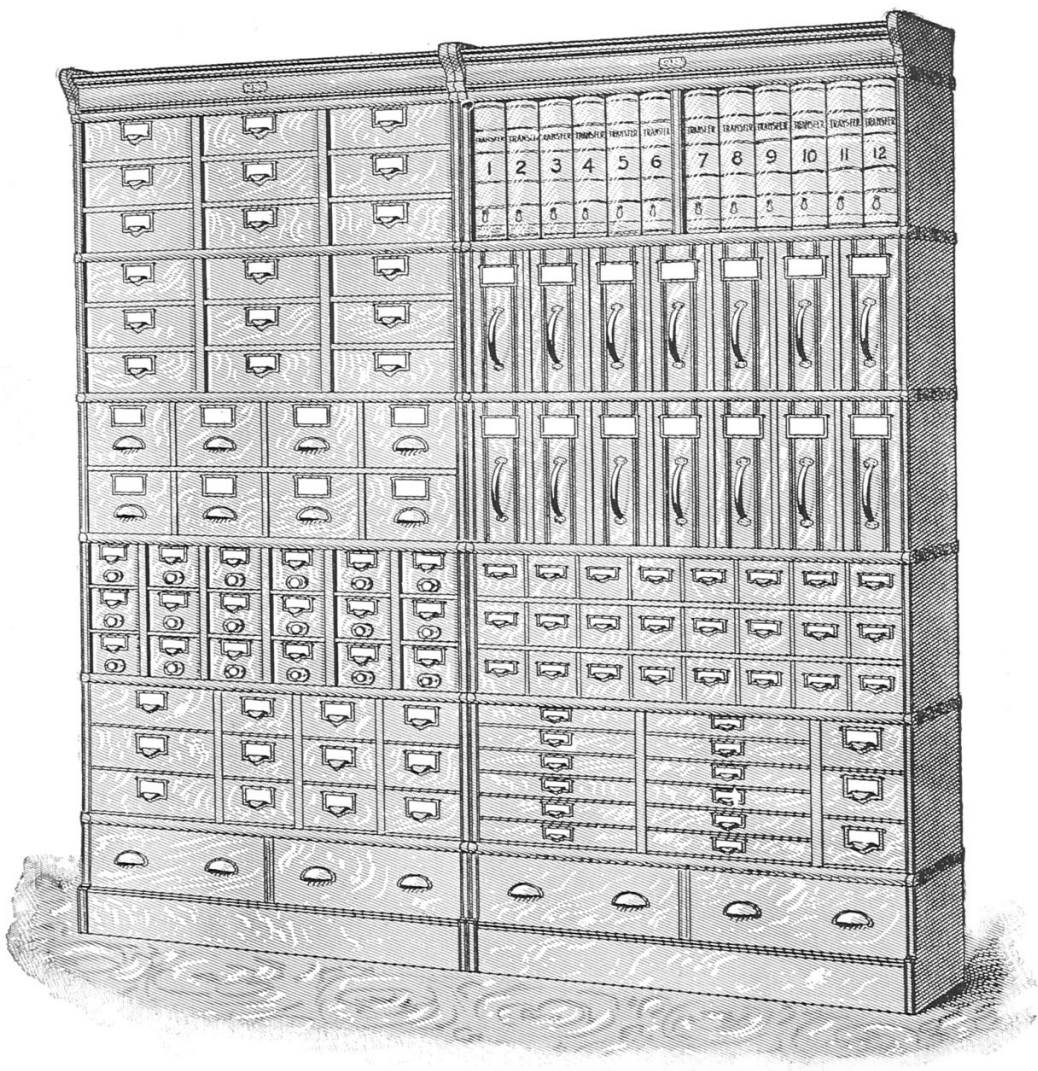


THE above illustrates five Globe-Wernicke units, with top and base, partly set up. The putting together of the various units to make the cabinet complete, as shown on next page, consists of merely putting one unit on top of another and surmounting the whole with the top.



A GLOBE-WERNICKE combination comprising five units with top and base, made up of the following:

1—No. 13 C. Top,	- - -	See page 12
1— " 13 L. F. Unit,	- - -	" " 16
1— " 13 D. F. "	- - -	" " 19
1— " 13 R. F. "	- - -	" " 20
1— " 13 P. H. "	- - -	" " 21
1— " 13 L. B. "	- - -	" " 21
1— " 13 L. D. Base,	- - -	" " 13



A GLOBE-WERNICKE combination two units wide, comprising ten units, two tops and two bases, made up as follows:

Left Section.					Right Section.				
1—No. 13 C. Top, -	See page			12	1—No. 13 C. Top, -	See page			12
2— " 13 L. F. Units,	"	"		16	1— " 13 T. C. "	"	"		22
1— " 13 R. F. Unit,	"	"		20	2— " 13 D. F. Units,	"	"		19
1— " 13 C. I. 35 Unit,	"	"		17	1— " 13 P. H. Unit,	"	"		21

1	" 25 H. D. Base,	" " 15

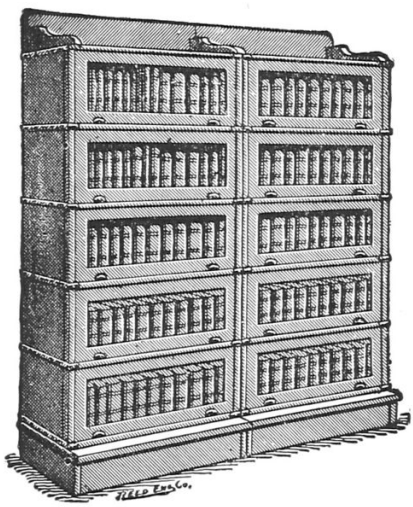
The Wernicke Elastic Bookcases.



10 Unit Bookcase.

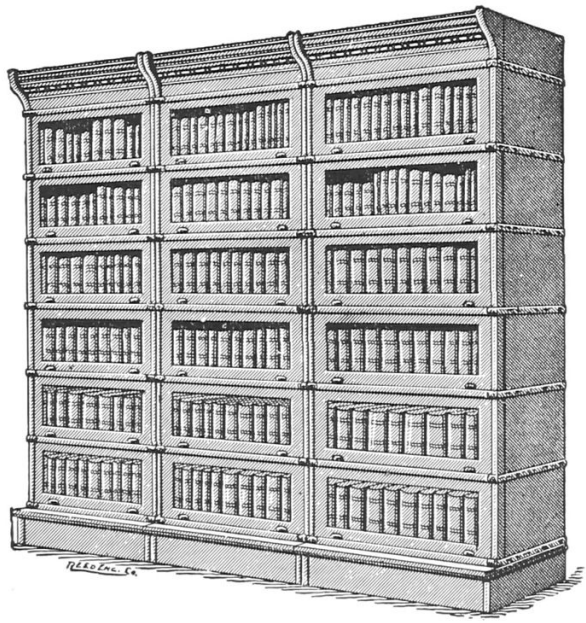
MADE on the Unit System and under the same patents as the Globe-Wernicke Cabinet. Units fitted with dust-proof glass doors and made in different heights and depths and also in different woods. The only bookcase made adapted to a growing library.

Commencing with ten or a dozen books in a one unit case and expanding unit by unit, a library, be it large or small, may always be properly cased and at a minimum cost.

Send for booklet containing full description and net delivered price list, from which there is no deviation.

THE Wernicke Elastic Bookcases are made by The Wernicke Company, but The Globe Company have exclusive control of their sale in the cities of Cincinnati, Chicago, New York and Boston, and their vicinities, and are the authorized agents for all other territory excepting such cities as have established agencies.

NOTE—The Wernicke Bookcase units, being 34 inches wide outside, will not unite with the Globe-Wernicke units.



18 Unit Bookcase.
